

Volunteers Needed!

For a study looking at retinopathy in children with Type 1 Diabetes

For more information contact

- **Dr. Brittany Bruggeman** at bruggemanbr@ufl.edu or
- **Dr. Chelsea Zimmerman** at cfzimmerman@ufl.edu

Who: Ages 9–26 who have had Type 1 Diabetes for at least one year

What: We are screening children and young adults with Type 1 Diabetes for retinopathy using a portable retinal camera. Volunteers will have pictures taken of their eyes to look for signs of retinopathy. Their eyes will not be dilated. These pictures will be evaluated by a licensed ophthalmologist. If the pictures are positive for retinopathy or are unclear, study staff will call you with the results. If they are normal, you will receive a letter in the mail. We will be checking HbA1c levels on participants and will ask you to fill out a brief questionnaire.

When/Where: Volunteers will be recruited at the Friends For Life Orlando 2016 meeting. The screening takes less than 7 minutes to complete.

Why: To help us understand the frequency of retinopathy in children with Type 1 Diabetes and the risk factors for early development of retinopathy.
