

“OneTouch® UltraSmart® allowed Jimmy’s mom to see that specific foods had more of an effect than what she expected.”

H. Peter Chase, MD  
Barbara Davis Center for Childhood Diabetes  
Denver, Colorado

#### PATIENT PROFILE

Jimmy, 11 years old, type 1 diabetes. Diagnosed at 6 years of age.

#### CLINICAL ISSUE

Jimmy’s mom wanted to be more proactive in assessing the effectiveness of his therapy.

#### Helps parents take charge

“OneTouch® UltraSmart® helps Jimmy’s mom enter and display information in a meaningful way.”

“She appreciated seeing weekly, monthly, and three-month averages.”

“The meter also allowed Jimmy’s mom to see that specific foods had more of an effect than what she would expect. For example, she had entered 45 grams of carbohydrates for macaroni and cheese but, two hours after the meal, he was running a blood sugar of 240 mg/dL.”

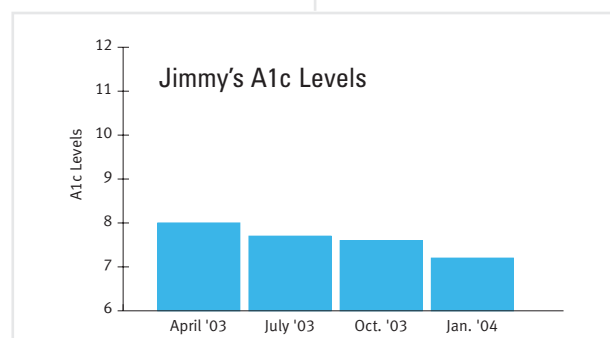

“When we ask families to do postprandial blood sugars, OneTouch® UltraSmart® offers the ability to look at before and after values and get means for each.”

#### Facilitates therapy changes

“At the time Jimmy started testing with the OneTouch® UltraSmart®, we changed his therapy from the traditional two shots a day of NPH and Humalog® insulin to basal bolus insulin therapy with a once daily Lantus® injection and Humalog® insulin prior to meals.”

“The OneTouch® UltraSmart® gave us a chance to keep very close tabs on what was happening.”

“The transfer was successful and his A1c has gone from 8.0 to 7.7 to 7.6 to the most recent one last month of 7.2.”

The Barbara Davis Center for Childhood Diabetes is the largest diabetes and endocrine care program in the Colorado community. The Center is managed as a distinct administrative unit of the University of Colorado School of Medicine and is located on the University of Colorado Health Sciences Center campus in Denver, Colorado.

# Do you have motivated parents and patients like Jimmy?

“My experience in over 30 years of diabetes management is that kids with parents who are very involved are generally the ones who do best. With OneTouch® UltraSmart®, Jimmy’s mother feels like she is able to see what’s happening and be part of the decision making.”

—H. Peter Chase, MD

**OneTouch® UltraSmart® puts results in context so patients see what’s working and where they need to focus.**

- > Patients just test their blood glucose as usual
- > Test results are automatically stored with date, time, and mealtime
- > See for yourself how glucose results are automatically stored in eight easy-to-understand charts and graphs

**Prescribe OneTouch® UltraSmart® for ALL of your motivated patients.**
