October 2006

Dear Friend:

Thank you for your interest in BD Diabetes Care products. We wanted you to be aware of some important information for individuals interested in, or using, BD blood glucose monitors and BD™ Test Strips.

On September 28, 2006, BD announced that it has decided to exit the blood glucose monitoring (BGM) market. As a result, BD will immediately stop distribution of the BD Logic® Blood Glucose Monitor.

BD will, however, continue to distribute BD™ test strips through December 2007.

We believe this transition period will provide you sufficient time to find a replacement blood glucose monitor. We recommend that you work with your healthcare team to determine the best replacement monitor.

This announcement is limited to BD blood glucose meters and test strips and has no impact on other BD diabetes care products such as insulin syringes, pen needles and lancets.

BD will continue to provide ongoing customer service support to you throughout this transition.

You can continue to use your BD BGM products with confidence.

We appreciate the confidence you have placed in BD Diabetes Care and we regret any inconvenience this may cause you. If you have any questions please call our toll-free Customer Care line at 1-866-556-8123.

Sincerely,

*John Simmons*
