

# Do You Have a Family Member With Type 1 Diabetes?

A Study to Screen for Type 1 Diabetes

change the outcome®

CCHMC IRB #2008-0861

## What

This research study is being conducted to learn more about how type 1 diabetes develops and to look at ways to delay it or prevent the condition from occurring.

## Who

Children, teens and adults 1 to 45 years old (without diabetes) with a family member with type 1 diabetes may be eligible to participate.

## Pay

There is no cost to you or your insurance company, but compensation is not provided for this phase of the study. (Should you or your child test positive for a risk to develop type 1 diabetes, you could take part in and be compensated for two other study phases.)
