

Type 2 Diabetes Study for Children and Teens

Type 2 Diabetes Medication Study

change the outcome®

CCHMC IRB # 2009-0765: V1

What

This is a research study to evaluate how safe and effective the investigational drug liraglutide (a drug that should reduce blood glucose levels) is, in treating children and teenagers with type 2 diabetes.

Who

Children and teenagers 10 to 17 years old who have been diagnosed with type 2 diabetes and whose doctor has determined that treatment with diet and exercise has not adequately controlled his/her blood sugars may be eligible to participate.

Pay

Families will receive up to \$875 for time and travel. They will also be reimbursed for out-of-pocket expenses, if travel is more than 50 miles.

Details
